DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 29-32 and 42-44, drawn to a method and package with a single inlet port, classified in class 436, subclass 180.
- II. Claims 12-20, drawn to a package with housing having first and second ports, classified in class 422, subclass 104.
- III. Claims 21-28, 33-41, drawn to a method and package, classified in class 435, subclass 287.3.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. Group I recites the step of adding or removing a fluid through a first port into a chamber. Group III recites a method requiring test fluid be introduced through a third port, subsequently adding a wash through a first port and then exhausting fluid through a second port.

Inventions III and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 1743

claimed because the package array and method of Group III does not require that the second port formed on the side of the multiple fluid distribution channel opposite that of the first port of Group II for patentability. The subcombination has separate utility such as a housing for a multi-well plate.

This relationship is also applicable to Groups II and I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for the others, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Gordon Stewart on August 15, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to P. Kathryn Bex whose telephone number is (703) 306-5697. The examiner can normally be reached on Mondays-Thursdays from 6:00 am to 3:30 pm EST.

The fax number for the organization where this application or proceeding is assigned is (703) 305-7718 for official papers prior to mailing of a Final Office Action. For official papers after mailing of a Final Office Action, use fax number (703) 305-3599. For unofficial or draft papers use fax number (703) 305-7719. Please label all faxes as official or unofficial. The above fax numbers will allow the paper to be forwarded to the examiner in a timely manner.
